**Khordadgan** Celebration: The 6th day of the 3th month (Khordad Mah) - (27th day of May)

Khordad [Xordād] is the third month of the Solar Iranian calendar. It begins in May and ends in June by the Gregorian calendar. Khordad is the third month of the spring season (Bahār). The word (Khordad) is derived from the name Haurvatat one of the great Amshasepandan in Ancient Iranian Religion (the Religion of Zoroaster).

The sixth day of the month and third month of the year are named after Haurvatāt/Khordād/Xordād and are under Haurvatat protection.

Haurvatat (Avestan: haurvatāt), Pahlavi (Middle Iranian): Hordād, in Irani Language (Persian) as Khordād is the Old Iranian language word for the Zoroastrian concept of perfection.

Haurvatat was the Amesha Spenta associated with , plants and water.

The Haurvatat symbol in nature is the Madonna lily flower (Persian: gol e Susan)

In Avesta, (Haurvatat (Khordad) Yasht (Yasht 4), Haurvatat is described as having been created by Ahura for the help, joy, comfort, and pleasure of the ashavan (the follower of Asha).

Jashn e Xordādgan (Khordadgan Celebration): The 6th day of the 3th month (Khordād Mah) Iranian calendar. In this day people used to go near the rivers, trees and green plants because green nature is at the peak of it's perfection in Khordad (May/June)
